

Dear FCC:

I love the XM Satellite Radio traffic and weather. It is the only place that I can go to listen to weather around the U.S. Since I travel quite a bit, I like to hear weather not only here, but also in the places I travel. I do not mind paying for the services, and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Please reject NAB's petition 04-160.
